

The All-Name Index to L240
THE TYRELLS OF ENGLAND

Original Book by

Dr. Brown's 1981 book was originally published without an all-name index. When I acquired a copy, I had wondered about this oversight. Now that I've done the work I know why: His wandering style, his numerous back references, and the tremendous redundancy of Christian names in the Tyrell family make indexing a very time-consuming task. I've probably made mistakes, such as listing the same person in two different ways and misidentifying persons in multiple references. For this I apologize.

Because the same Christian names reappear so often in all recorded branches of the family, I have tried to sort them out by adding additional information at the index reference. Most (but not all) entries consist of three components. First is the surname, Christian names and title (if any). Second is a date and event (if any) associated with the name. Third is a place associated with the name. Please take note, there is not necessarily a connection between the date and the place. Please consider them to be independent of each other. Here are some examples.

Tyrrell, Toby Sir |1617 b. Thornton, 145

Sir Toby was born in 1617 and his name is associated with Thornton (Manor), but he was not necessarily born at Thornton. (The *b.* is placed after the date to facilitate computerized sorting.)

Blount, Elenor Mrs. |1681 Thornton, 146

We don't know Elenor's surname, but she appears as the wife of Blount, hence the *Mrs.* Her name appears in the text associated with the year 1681 and she is associated with Thornton, but not necessarily together.

Turnor, Ann |18th cen., 148

Ann's lifetime appears to be connected with eighteenth century records, but no place is mentioned.

I have also used a few abbreviations which may not be U.K. standard. They are listed here:

b. = born
ca. = *circa*
cen. = century

d. = died
gen. = generation
Herefds. = Herefordshire

Hunts. = Huntingdonshire
m. = married
Worcs. = Worcestershire
